

Card Inspection Report

Example inspection - supplied card scans

Prepared 27 Sept 2026, 7:25 pm

CONDITION ESTIMATE

Not measured

Surface is not assessed.

An image measurement needs review; a combined estimate is not available.

FRONT

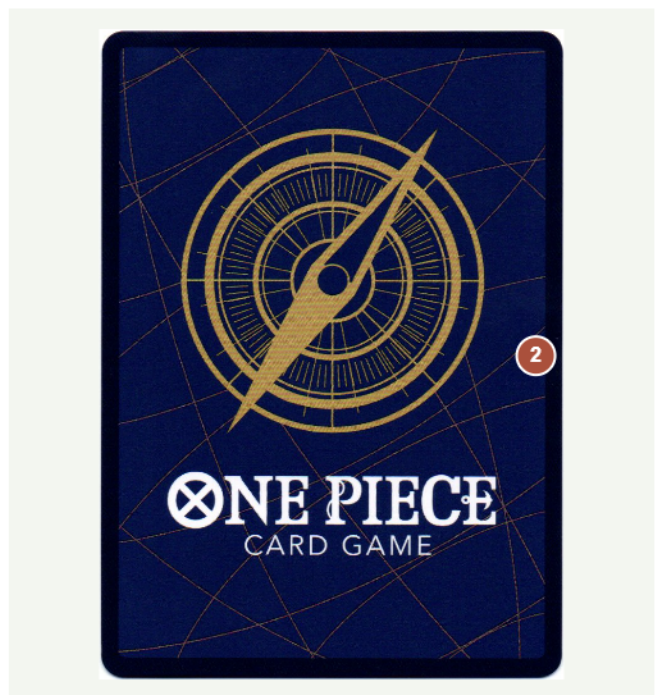

Not measured

Centering: left / right	Not measured
Centering: top / bottom	Not measured
Corner score	Not measured
Edge score	Not measured
Surface	Not assessed

1 operator observation

BACK

Side estimate: Near Mint+ · 8.9 / 10

Centering: left / right	50/50
Centering: top / bottom	43/57
Corner score	7.7 / 10
Edge score	9.6 / 10
Surface	Not assessed

1 operator observation

Read the image, then the measurements.

Centering compares opposite borders; 50/50 is even. Corner and edge scores are image-based aids. Numbered markers link to operator observations. Inspect the physical card under suitable lighting.

Observations

Numbered markers match the card images on page 1.

FRONT

Boundary needs review

All four card edges could not be verified. Use a clearer background or adjust the scan.

#1 Review area

Demonstration observation: inspect this area under angled light. This marker is an example, not a finding of damage.

BACK

Automated indicators (review)

Image indicators are not confirmed physical defects. Check the actual card.

Corners: Top-Left: fraying indicator; Top-Right: fraying indicator; Bottom-Left: fraying indicator; Bottom-Right: fraying indicator.

Edges: Top: chipping indicator; Bottom: chipping indicator; Left: fraying indicator; Right: no significant indicator.

#2 Edge check

Demonstration observation: compare the printed border with the physical edge. Confirm the condition in person.
